

Q1. (2021)

(A)

| Q     | Answer                                                                           | Mark | Comments                           |
|-------|----------------------------------------------------------------------------------|------|------------------------------------|
| 18(a) | Negative                                                                         | B1   | ignore descriptive words eg strong |
|       | <b>Additional Guidance</b>                                                       |      |                                    |
|       | Description of relationship only<br>eg as the car gets older the value goes down |      | B0                                 |

(B)

| Q     | Answer                     | Mark | Comments |
|-------|----------------------------|------|----------|
| 18(b) | 4000                       | B1   |          |
|       | <b>Additional Guidance</b> |      |          |
|       | (3, 4000)                  |      | B0       |

(C)

| Q     | Answer           | Mark | Comments |
|-------|------------------|------|----------|
| 18(c) | [15 000, 15 400] | B1   |          |

(D)

| Q     | Answer                    | Mark | Comments                                                                                                                                                           |
|-------|---------------------------|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18(d) | 2012                      | B2   | B1<br><br>horizontal line at $5600 \pm \frac{1}{2}$ small square<br><br>or<br><br>[6.8, 7.2]<br><br>implied by mark in correct place on line<br>or horizontal axis |
|       | Additional Guidance       |      |                                                                                                                                                                    |
|       | 2012 and 7 on answer line |      | B2                                                                                                                                                                 |

Q2. (2024)

| Q     | Answer                        | Mark | Comments                 |
|-------|-------------------------------|------|--------------------------|
| 12(a) | Distance (km)                 | B1   | oe<br>must have units    |
|       | (8, 38) and (8.5, 42) plotted | B1   | $\pm \frac{1}{2}$ square |
|       | <b>Additional Guidance</b>    |      |                          |
|       | Ignore any lines              |      |                          |
|       | Ignore other plots            |      |                          |
