[2 marks]

Answer _____

Q3. (2024)

11 A window cleaner uses this formula.

$$C = 2W + 5$$

 C = cost, in £, for the customer W = number of windows to be cleaned

11 (b) The cost for another customer was £24

Show why this cost **must** be incorrect.

[1 mark]

Q4. (2024)

24 Solve $7x - 22 = 4x + 29$

[3 marks]

 $x =$ _____

Q5. (2024)

26 (b) Solve $5y + 14 \geq 11$

[2 marks]

Answer _____
