

Q1. (2022)

- 14 A survey was held in a football stadium.
A sample of the crowd was asked about the importance of a family area.
The pie chart represents the answers.

(A)

- 14 (a) The total number of people in the crowd was 29 250
Estimate how many people in the crowd think that a family area is **very important**.
Assume that the sample is representative of the crowd.
